

Naming practice... Alkanes, alkenes and alkynes oh my!

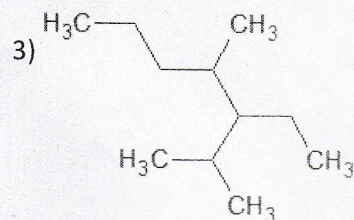

Alkanes

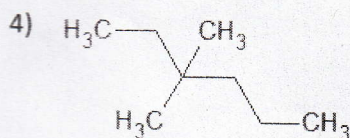

pentane

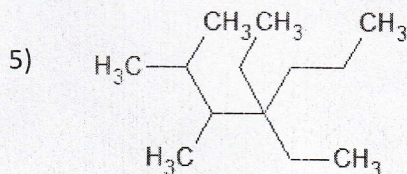

2-methylbutane

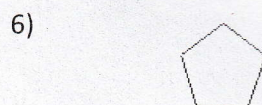

3-ethyl-2,4-dimethylheptane

3,3-dimethylhexane

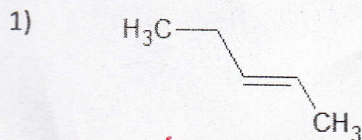

4,4-diethyl-2,3-dimethylheptane

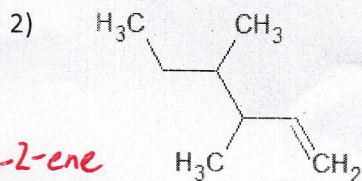

cyclopentane

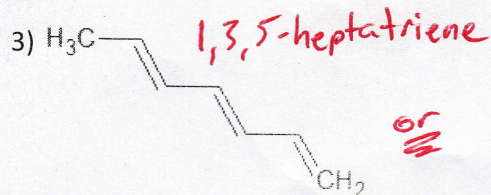

Alkenes

2-pentene or pent-2-ene

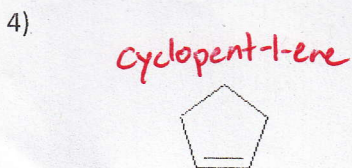

3,4-dimethylhex-1-ene

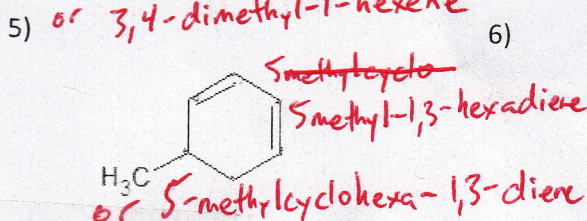

1,3,5-heptatriene

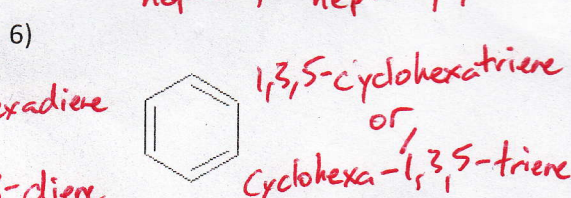

or

or 1-cyclopentene

5-methylcyclohexa-1,3-diene
or 5-methyl-1,3-cyclohexadiene

1,3,5-cyclohexatriene
or
cyclohexa-1,3,5-triene
